

**Kellanova U.S. Products That Do Not Contain or
Declare Peanuts or Tree Nuts**

DATE OF ISSUE: August 10, 2026

ISSUED TO: Kellanova U.S. Away From Home Customers

The FDA defines a food allergy as a specific type of adverse food reaction involving the immune system. The Food Allergen Labeling and Consumer Protection Act (FALCPA) identifies the eight most common allergenic foods as: peanuts, tree nuts, milk, eggs, soybeans, wheat, fish and shellfish. According to FALCPA, these eight major food allergens account for 90% of all food allergies. The Food Allergy Safety, Treatment, Education, and Research (FASTER) Act declares sesame as the 9th major food allergen recognized by the United States. Kellanova will declare the presence of these ingredients in the ingredient list and in an allergen box adjacent to the Nutrition Facts product information on each labeled product. The declaration is made in the form of a “Contains” and/or “May Contain” statement within the allergen box.

As of the date of issue, the following Kellanova U.S. products DO NOT contain or declare Peanuts or Tree Nuts. The U.S. products listed below ARE NOT allergen free. Some contain milk, egg, soy, wheat or sesame ingredients. Additionally, this is not an all-inclusive product list. For products not listed, please check the allergen information printed on package for the most up-to-date peanut and/or tree nut declaration.

Products are subject to change without notice. ALWAYS refer to on-package labeling for the most accurate nut and allergen information. For additional product information, please visit the **Kellanova** Away From Home website www.kellanovaawayfromhome.com.

Supersedes letter dated: January 5, 2026

Information presented in this letter applies to products intended for US consumers only

Case Code	Brand	Product Name	Category
